INFORMATION TO AUTHORS

Contributions, written in English, should be sent in triplicate preferably to one of the editors. Contributions may also be submitted to a member of the Advisory Editorial Board who is familiar with the research presented, in which case two copies plus the original figures should be sent simultaneously to one of the editors.

All manuscripts will be refereed. They should be typed with double spacing, first copies (or clear Xerox copies thereof), with a wide margin, all pages should be numbered. Before mailing the manuscripts, please check the following points:

1. *Title*: The title should be chosen for its sufficient information content such that it conveys to the informed reader the particular nature of the contents he can expect from the paper. When the length exceeds 45 letters, an abbreviated running title should be indicated.
2. *Abstract*: The abstract of 100–150 words should contain all the substance of the methods and the results achieved as well as keywords of the paper.
3. *Address*: The name(s) of the author(s) and the name and address of the institute, where the research work was done should be indicated on the manuscript. Proofs will be sent by the publisher to this address, unless specifically requested otherwise.
4. *Figures*: The drawings for the figures must be submitted on separate sheets, drawn in black Indian ink in large size and carefully lettered (with the use of stencils). The lettering as well as the details should have proportionate dimensions so as not to become illegible or unclear after the usual reduction by the printers; in general the figures should be designed for a reduction factor of two to three. Each figure should have a number and a caption; the captions should be collected on a separate sheet. The appropriate place of a figure should be indicated in the margin. Your figure material will be returned after publication of the article.
5. *Formulae*: Displayed formulae should be numbered and typed or clearly written by hand. Vectors will be printed in bold-face italics (heavy, slanting type), and should be indicated by a wavy underlining in the type-script.

   Special attention should be paid to characters that can easily be misread, such as i (lower case), I (cap.), l (el), 1 (one), (prime), o (lower case), O (cap.), 0 (zero), ° (degree), u, v (vee), ν (Greek nu), V (cap) x, $\times$, X, z, Z, p, P, ρ (Greek rho), etc.
6. *Tables*: Tables should be typed on separate sheets. Each table should have a number and a title. The appropriate places for the insertion of the tables should be indicated in the margin.
7. *References*: In the text, reference to other parts of the paper should be made by section (or equation) number, not by page number. References to other papers should be consecutively numbered in the text and should be listed by number, preferably as in the following examples:

   For a book: A. Messiah, Quantum mechanics, Vol. 1 (North-Holland, Amsterdam, 1970).

   For a paper in a journal: C.J. Winscom and A.H. Maki, Chem. Phys. Letters 12 (1971) 264.

   For a paper in a contributed volume: A. Carrington, in: Magnetic resonance and radiofrequency spectroscopy, ed. P. Averbuch (North-Holland, Amsterdam, 1968) p. 23.

   For an unpublished paper: G.J. Lycett, Ph.D. Thesis, University of Birmingham, England (1970).
8. *Footnotes*: As far as possible, footnotes should be avoided.

ANNOUNCING
A PERSONAL SERVICE
FOR YOU

surface science letters

In a field as rapidly growing and interdisciplinary as surface science it can become difficult for the research worker to keep up-to-date with the most recent developments in his own and related areas. The North-Holland journal Surface Science has been providing an authoritative forum for the dissemination of research results in the field, but the circulation has been mainly confined to libraries, with a resulting inconvenience to the researcher.

Now you can receive **on your own desk** the essentials of the information in your library by subscribing to

surface science letters

This bi-weekly publication includes the letters to the editors and abstracts of papers to appear in Surface Science, as well as announcements of conferences and other news items.

All for Dfl. 60/U.S.$ 30 per year – postage included!
